

# My Course Analytics Data (MCAD)

tool has been created to

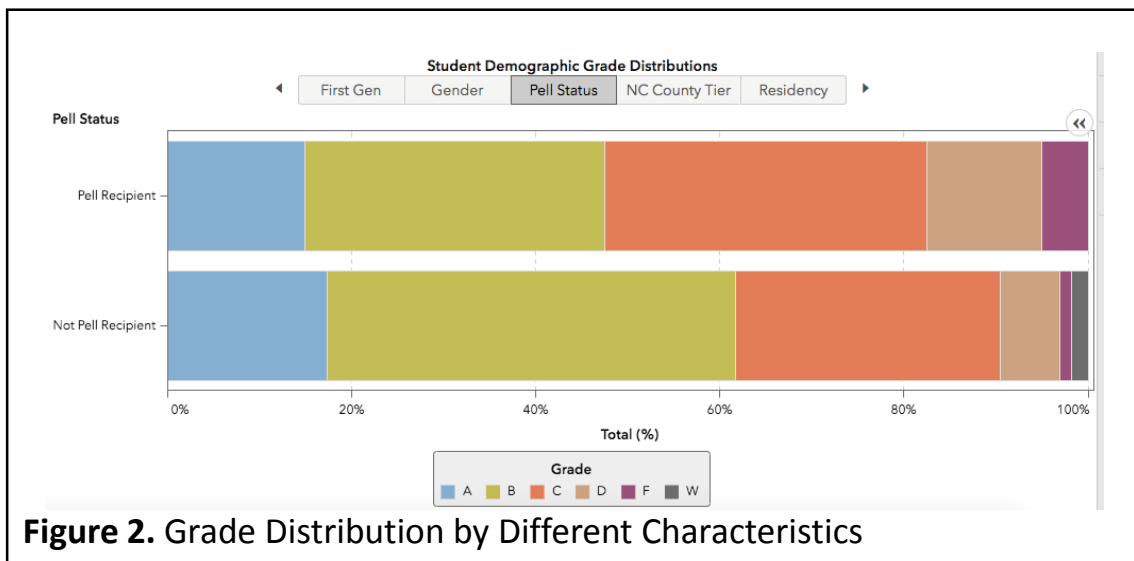

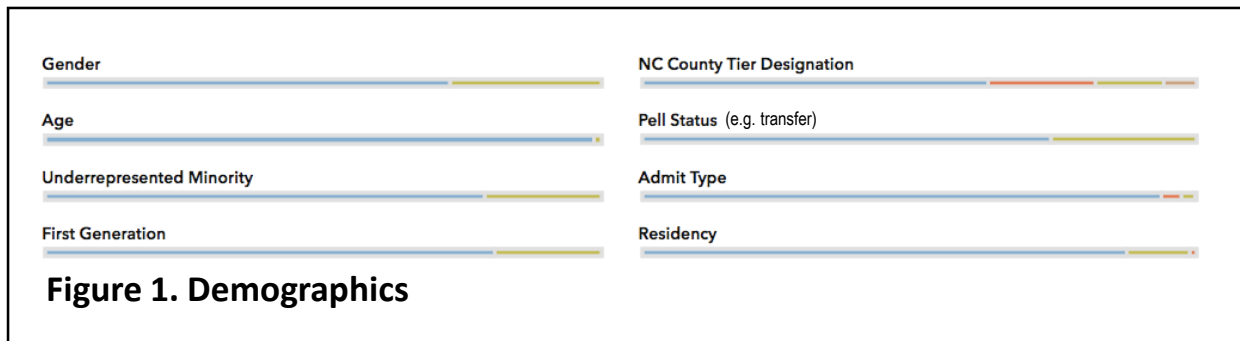

**thrive**  
@CAROLINA

THE UNIVERSITY  
of NORTH CAROLINA  
at CHAPEL HILL

support faculty instructors who are interested in 1) learning more about the diversity of students enrolled in their courses and 2) using student information to better serve diverse student learning needs. Data are available from Fall 2010 to the most recent semester during which the course was taught and completed.

**Figure 1:** Example data from the dashboard show the percent of students in different demographic categories. Hovering over the bars will give the percentages and total number in each subgroup.

**Figure 2:** Example data from the dashboard show the grade distribution of a selected group of students (i.e. Pell eligible status). Dashboard users customize their queries to examine individual courses in specific semesters or to combine multiple semesters.

Interested in seeing your own data? The MCAD pilot will be expanded soon. More at: [cfe.unc.edu/mcad](http://cfe.unc.edu/mcad)
