

CONSIDER IT : Poll Everywhere

Why use a classroom response system?

More effective than raising hands when:

- Tracking student participation
- Tallying student responses, especially in large classes
- Preserving anonymity
- Having students interact directly with an image
- Asking students to rank response options
- Co-relating responses across two or more questions

Classroom response systems help instructors:

- Assess student understanding of course topics
- Provide immediate feedback to students
- Serve as a springboard for class discussion
- Build class community
- Encourage student completion of course readings
- Conduct low-stakes assessments

USES

Poll Everywhere

ADVANTAGES

Students can use their own devices (phones, laptops, tablets) instead of purchasing a clicker

Free to students & instructors

Anonymous or identified student responses

Save and re-use polls from semester-to-semester

Multiple question types

Not designed for high-stakes assessments

Need reliable wireless internet or cell coverage in classroom
